THE RESPONSIVE SADDLE

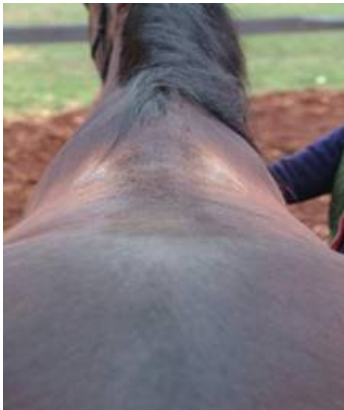

What Horses Want You to Know About Saddle Fit!

Presenting an Educational and Informative Saddle Fitting Seminar

A saddle can enhance — or impede — your communication with your horse.

Learn the valuable saddle fitting tools and techniques you need to determine the difference.

The equivalent of a short course in saddle fit, our classroom lecture and hands-on workshop will provide you with the information and tools you need to assess the fit of your current saddle and determine your horse's comfort level.

Originally created for university level, accredited equine education courses, the information is derived from the studies of leading saddle fitters, manufacturers and veterinarians in the US, Canada and England.

Saddle Fitting Seminar Covers:

- Assessing the Horse
- How conformation affects saddle fit
- Fit for the rider
- Measurement / testing tools
- Girthing systems
- Saddle designs & innovations

Photos and visual aids make the information easily accessible for riders of all levels and our interactive format makes for lively and educational discussions.

Seminar attendees say:

"This information was so thorough, I could have listened for hours"

"This seminar clearly gave me insight as to the improvements that can be done to saddle fit."

"I didn't realize saddle fit is more things to look for besides white hair and sweat"

"This seminar should have been mandatory for everyone in the barn"
